	Philippine Depository & Trust Corp.						

<sup>1</sup>As a percentage of average daily NAV for the month valued at Php270.85 Million.

### INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Balanced Fund intends to achieve capital appreciation as well as a steady income stream by investing in a diversified portfolio of high-grade tradable fixed income securities issued by the Philippine government and local corporations and choice equity issues listed in the Philippine Stock Exchange (PSE). Up to 60% of the Fund may be invested in equity issues at any point in time while the balance shall be in fixed income securities with a weighted average portfolio modified duration of not more than five (5) years. The Fund aims to outperform its benchmark which is 60% Philippine Stock Exchange PSEi Total Return Index (PSEi TRI) + 40% Bloomberg Philippine Sovereign Bond Index 1 to 5 Year (BPHIL15 Index).

### CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

**The Chinabank Balanced Fund is suitable only for investors who:**

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and,
- have an investment horizon of at least five (5) years.

### KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 60% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits as well as the Fund's average duration for its fixed-income investments are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

- **THE UITF IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED NOR GOVERNED BY THE PDIC.**
- **THE UITF IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUST ENTITY OR ITS AFFILIATES OR SUBSIDIARIES.**
- **DUE TO THE NATURE OF THE INVESTMENTS OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED. HISTORICAL PERFORMANCE, WHEN PRESENTED, IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.**
- **ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.**
- **THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**
- **THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF'S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.**

## FUND PERFORMANCE AND STATISTICS AS OF JULY 31, 2025

(Purely for reference purposes and is not a guarantee of future results)

### NAVPU GRAPH

### CUMULATIVE PERFORMANCE (%)

Period	1mo	3mos	6mos	1yr	3yrs
Fund	0.15%	1.12%	7.33%	5.79%	20.16%
Benchmark	-0.89%	-0.01%	6.47%	0.69%	10.40%

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on [www.pse.com.ph/indices](http://www.pse.com.ph/indices).

The BPHIL15 Index is a systematically designed, rules-based, market value-weighted index that measures the performance of fixed-rate and zero-coupon local currency securities that are publicly issued in the Philippines. It includes a diversified range of fixed income securities with different coupon rates, maturities of between 1 to 5 years, minimum par amounts of Php3.0Bn, and are traded in the Philippine market. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on BPHIL15 Index and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the markets or asset classes the Fund represents. In the case of PSEi TRI, its characteristics, including its composition and the corresponding weights of its constituents, serve as reference point for the Fund's allocation and security selection profile. Meanwhile, in the case of BPHIL15 Index, its characteristics serve as reference point for the Fund's duration and credit positioning.

### PORTFOLIO COMPOSITION

### NAVPU OVER THE PAST 12 MONTHS

Highest	1.866254
Lowest	1.663486

### STATISTICS

Weighted Average Duration	4.42
Volatility, Past 1 year <sup>2</sup>	5.90%
Sharpe Ratio <sup>3</sup>	0.24
Information Ratio <sup>4</sup>	4.55

<sup>2</sup>**Volatility** measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

<sup>3</sup>**Sharpe Ratio** is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

<sup>4</sup>**Information Ratio** measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

## OTHER DISCLOSURES

### RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper, amounting to Php571.04 thousand, which were approved by the Board of Directors/Trust Investment Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

### OUTLOOK AND STRATEGY

July marked the end of the 90-day pause on the reciprocal tariffs announced by US President Donald Trump last April during "Liberation Day." Country-specific rates, initially scheduled to take effect on July 9, were later delayed to August 1, with official notices sent to various countries reflecting updated tariff levels. For the Philippines, the rate was set at 20%, up from the original 17% announced in April. On July 22, during a White House meeting, President Ferdinand Marcos Jr. secured a reduction in the tariff on Philippine exports to 19%. In return, the Philippines agreed to remove tariffs on US goods, specifically automobiles, wheat, soy, and pharmaceutical imports. These trade developments weighed on the Philippine peso, causing it to weaken from 56.322 to 58.325 against the USD. Additionally, diverging monetary policies affected the local currency. While the Bangko Sentral ng Pilipinas (BSP) remained open to easing policy rates in upcoming meetings, the US Federal Reserve kept rates steady during the month, with the market expecting no change in stance when they meet next in September.

The peso's weakness extended to the local equity market. While the MSCI All Country Weighted Index gained 1.28% in USD terms, the Philippine Stock Exchange Index (PSEi) fell 112.21 points, or 1.76%, closing at 6,252.73. Sector performance was generally negative, with Mining and Oil (-7.33%), Financials (-3.89%), Holding Firms (-3.59%), Property (-1.81%), and Industrials (-0.44%) pulling the market lower. Financials underperformed for the third consecutive month amid concerns that potential policy easing would compress bank margins. Conversely, Services (+1.48%) rose, defying the overall market trend. Among index constituents, BLOOM (-20.55%), AGI (-14.63%), AEV (-9.17%), BPI (-9.08%), and CNVRG (-8.12%) led the laggards. On the other hand, PGOLD (+11.11%), ICT (+9.00%), EMI (+8.58%), TEL (+8.22%), and JGS (+5.10%) led the gainers. BLOOM and AGI struggled due to increased regulatory scrutiny on online gaming platforms, with lawmakers and agencies calling for tighter controls and outright bans because of perceived social costs. Separately, sentiment was impacted by a large block sale of SM and SMPH shares worth Php12.6 billion by an institutional investor. Overall, foreigners were net sellers, withdrawing Php1.676 billion during the month. Year to date, the PSEi is down 4.23%, with total net foreign outflows of Php40.29 billion. Q2 earnings season is underway, with BPI, BDO, CBC, and MER, which collectively constitute about a quarter of the index weight, reporting weighted earnings growth of 6.22%. The remaining index members will release results in the coming month, along with the expected announcement of the PSEi rebalancing. Given the current environment, the Fund will maintain a selective approach to positioning, balancing value and growth considerations.

In the fixed income market, the local yield curve was relatively stable, declining by an average of 6 basis points. The 2-year yield ended at 5.688%, down 3 basis points, while the 10-year yield closed at 6.211%, down 9 basis points. The Bureau of the Treasury (BTr) remained active in the primary market, successfully raising funds across various tenors. It secured PHP 30 billion from the reissuance of the 5-year FXTN 07-70 at 5.896% with a bid-to-cover ratio of 1.9x, followed by another PHP 30 billion from the 7-year FXTN 10-69 at 6.128%, which was 2.1x oversubscribed. The 10-year FXTN 10-73 brought in PHP 25 billion at 6.285% and was 2.5x oversubscribed, while the 3-year FXTN 07-64 raised PHP 20 billion at 5.817%, 2.3x oversubscribed. Rounding out the month, the 19-year FXTN 20-27 generated PHP 20 billion at 6.584%, attracting nearly twice the offered amount. Looking ahead, the BTr announced the launch of the 5-year retail treasury bond RTB 31, with a minimum aggregate principal of PHP 30 billion. The issuance includes an exchange component for short-dated securities FXTN 10-60, FXTN 03-01, and FXTN 07-62. Following July's movements, the yield curve remains steeper than at the start of the year. Year-to-date, the 2-year yield has fallen by 27 basis points, while the 10-year yield has risen by 5 basis points. Expectations of further BSP rate cuts may continue to support intermediate- and medium-term bonds, while longer-dated securities could remain volatile due to trade and fiscal developments. Given this context, the Fund will remain opportunistic in bond acquisitions, aiming to improve portfolio yield while carefully managing duration risk.

### INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- Equities listed in the PSE;
- Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds and notes;
- Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks of their Philippine branches or any financial institution in any foreign country;
- Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- Such other tradable investment outlets/categories as the BSP may allow.

### OTHER BASIC FUND FACTS

<b>Trust Fee:</b>	1.00% p.a.	<b>Minimum Maintaining Amount:</b>	Php5,000.00
<b>Initial NAVPu:</b>	P1.000000	<b>Minimum Redemption Amount:</b>	None. Partial redemptions shall be allowed provided that the amount redeemed will not result to a balance below the minimum maintaining amount.

### IMPORTANT NOTICE

China Banking Corporation (Chinabank) may receive customer complaints, inquiries or any concern about its products and services through Customer Contact Center 24/7 Hotline: (+632) 8885-5888 or email: [online@chinabank.ph](mailto:online@chinabank.ph).

Chinabank is regulated by the BSP with contact number (+632) 8708-7087 and email address: [consumeraffairs@bsp.gov.ph](mailto:consumeraffairs@bsp.gov.ph).
