¹As a percentage of average daily NAV for the month valued at Php271.84 Million.

INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Balanced Fund intends to achieve capital appreciation as well as a steady income stream by investing in a diversified portfolio of high-grade tradable fixed income securities issued by the Philippine government and local corporations and choice equity issues listed in the Philippine Stock Exchange (PSE). Up to 60% of the Fund may be invested in equity issues at any point in time while the balance shall be in fixed income securities with a weighted average portfolio modified duration of not more than five (5) years. The Fund aims to outperform its benchmark which is 60% Philippine Stock Exchange PSEI Total Return Index (PSEI TRI) + 40% Bloomberg Philippine Sovereign Bond Index 1 to 5 Year (BPHIL15 Index).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Balanced Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and,
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 60% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits as well as the Fund's average duration for its fixed-income investments are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

- **THE UITF IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED NOR GOVERNED BY THE PDIC.**
- **THE UITF IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUST ENTITY OR ITS AFFILIATES OR SUBSIDIARIES.**
- **DUE TO THE NATURE OF THE INVESTMENTS OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED. HISTORICAL PERFORMANCE, WHEN PRESENTED, IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.**
- **ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.**
- **THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**
- **THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF'S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.**

Period	1mo	3mos	6mos	1yr	3yrs
Fund	-5.91%	-0.38%	2.18%	3.00%	15.07%
Benchmark	-5.90%	-0.34%	1.57%	1.30%	6.13%

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on www.pse.com.ph/indices.

The BPHIL15 Index is a systematically designed, rules-based, market value-weighted index that measures the performance of fixed-rate and zero-coupon local currency securities that are publicly issued in the Philippines. It includes a diversified range of fixed income securities with different coupon rates, maturities of between 1 to 5 years, minimum par amounts of Php3.0Bn, and are traded in the Philippine market. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on BPHIL15 Index and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the markets or asset classes the Fund represents. In the case of PSEi TRI, its characteristics, including its composition and the corresponding weights of its constituents, serve as reference point for the Fund's allocation and security selection profile. Meanwhile, in the case of BPHIL15 Index, its characteristics serve as reference point for the Fund's duration and credit positioning.

PORTFOLIO COMPOSITION

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper, amounting to Php901.29 thousand, which were approved by the Board of Directors/Trust Investment Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

NAVPU OVER THE PAST 12 MONTHS

STATISTICS

Weighted Average Duration	4.38
Volatility, Past 1 year ²	4.89%
Sharpe Ratio ³	-0.21
Information Ratio ⁴	1.09

²Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

³Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

⁴Information Ratio measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

OUTLOOK AND STRATEGY

Geopolitical tensions in the Middle East intensified in March as the United States and Israel carried out coordinated air strikes on Iran. This triggered retaliatory attacks that damaged key infrastructure, including oil facilities. A key escalation occurred when the Strait of Hormuz, a critical waterway through which around 20% of the global oil supply passes, was disrupted. The disruption drove a sharp spike in oil prices and raised concerns about a significant supply shock. Brent front-month futures surged to \$118.35 per barrel from \$72.48 the prior month. Asian economies were particularly affected given their reliance on Middle East oil. The Philippines, which imports over 90% of its oil requirements, is among the more exposed economies. In response, the government declared a national energy emergency and is exploring mitigation measures, including fuel tax relief and supply diversification. Meanwhile, the peso depreciated to an all-time low of 60.745 against the US dollar, reflecting heightened risk aversion. The conflict reignited volatility in financial markets.

In the equities market, the Philippine Stock Exchange Index (PSEi) fell 662.30 points, or 10.02%, to close at 5,948.94 for the month. The sell-off was broad-based, with Mining and Oil (-20.85%), Financials (-14.84%), Holding Firms (-11.34%), Property (-9.76%), Industrials (-5.64%), and Services (-5.01%) all posting losses. At the stock level, GTCAP (-22.39%), ALI (-21.39%), URC (-18.38%), BDO (-17.09%), and JFC (-16.96%) were among the biggest decliners. In contrast, SMC (+6.11%), ACEN (+4.98%), PLUS (+4.67%), DMC (+3.42%), and EMI (+2.83%) were among the few gainers. Foreign investors were net sellers, with outflows totaling Php13.84 billion. As a result, the PSEi's year-to-date return turned negative at -1.72%. Looking ahead, the PSEi is expected to remain sensitive to developments in the Middle East, as prolonged supply disruptions could keep inflation elevated and weigh on growth. Earnings expectations have been revised lower amid softer demand and margin pressure. Additionally, corporate activity is expected to slow, with IPO timelines likely to be deferred. Against this backdrop, the Fund remains selective, maintaining a balanced approach between value and growth opportunities to generate active returns.

Meanwhile, in the fixed-income market, bond yields moved higher across the curve, as markets priced out expected rate cuts and assessed the likelihood of policy tightening. Securities with maturities under 1 year increased by an average of 56 bps. The 2-year and 10-year government bond yields climbed by 88 bps and 105 bps to 6.03% and 6.97%, respectively, while longer-dated securities rose by an average of 52 bps, breaching the 7% level. The BSP held an off-cycle meeting and kept policy rates unchanged at 4.25%, saying it would allow more time to assess the impact of the supply shock. The central bank also raised its 2026 inflation forecast to 5.1%, above the 2 to 4% target band, and signaled that the April meeting remains open for potential policy adjustments. In the primary market, demand softened, with average bid-to-cover declining to 1.48x. Apart from the 5-year reissuance early in the month, which was fully awarded at Php30Bn, most auctions were partially awarded, as the Bureau of the Treasury rejected higher-rate bids. Out of the Php60Bn target, only Php25.3Bn was raised. The BTr also announced a lower bond borrowing program of Php420Bn for Q2, compared to Php500Bn in Q1. Yields may remain volatile given the ongoing conflict. While higher inflation is negative for bonds, slower growth may provide some offset. Against this backdrop, the Fund remains selective in its bond purchases, seeking to enhance portfolio yield while carefully managing duration risk.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Equities listed in the PSE;
- b) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- c) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds and notes;
- d) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks of their Philippine branches or any financial institution in any foreign country;
- e) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- f) Such other tradable investment outlets/categories as the BSP may allow.

OTHER BASIC FUND FACTS

Trust Fee:	1.00% p.a.	Minimum Maintaining Amount:	Php5,000.00
Initial NAVPu:	P1.000000	Minimum Redemption Amount:	None. Partial redemptions shall be allowed provided that the amount redeemed will not result to a balance below the minimum maintaining amount.
