INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Balanced Fund intends to achieve capital appreciation as well as a steady income stream by investing in a diversified portfolio of high-grade tradable fixed income securities issued by the Philippine government and local corporations and choice equity issues listed in the Philippine Stock Exchange (PSE). Up to 60% of the Fund may be invested in equity issues at any point in time while the balance shall be in fixed income securities with a weighted average portfolio modified duration of not more than five (5) years. The Fund aims to outperform its benchmark which is 60% Philippine Stock Exchange PSEi Total Return Index (PSEi TRI) + 40% Bloomberg Philippine Sovereign Bond Index 1 to 5 Year (BPHIL15 Index).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Balanced Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and,
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 60% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk**. This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

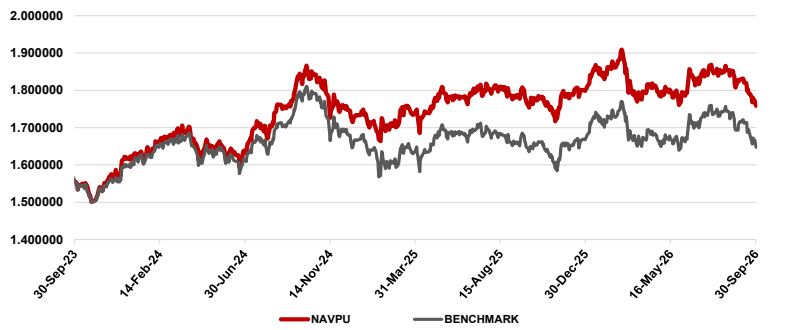

The Trustee only transacts with reputable counterparties, invests in debt securities and equities issued by prime companies which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits as well as the Fund's average duration for its fixed-income investments are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on www.pse.com.ph/indices.

The BPHIL15 Index is a systematically designed, rules-based, market value-weighted index that measures the performance of fixed-rate and zero-coupon local currency securities that are publicly issued in the Philippines. It includes a diversified range of fixed income securities with different coupon rates, maturities of between 1 to 5 years, minimum par amounts of Php3.0Bn, and are traded in the Philippine market. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on BPHIL15 Index and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the markets or asset classes the Fund represents. In the case of PSEi TRI, its characteristics, including its composition and the corresponding weights of its constituents, serve as reference point for the Fund's allocation and security selection profile. Meanwhile, in the case of BPHIL15 Index, its characteristics serve as reference point for the Fund's duration and credit positioning.

[2]**Volatility** measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

[3]**Sharpe Ratio** is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

[4]**Information Ratio** measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

OUTLOOK AND STRATEGY

Brent crude futures increased by 14.41% in September to US$103.53 per barrel amid continued tensions in the Middle East, and the peso weakened by 0.61% against the US dollar to close at Php62.645. Both added to inflation worries, even as inflation eased for a fourth straight month in August to 6.1%, down from 6.2% in July and the 7.2% peak in April. The Asian Development Bank (ADB) lowered its 2026 Philippine GDP growth forecast to 3.3% from 3.8%, and S&P Global Ratings cut its forecast to 2.9% from 4.1%.

In the equities market, the Philippine Stock Exchange Index (PSEi) declined by 276.85 points, or 4.65%, to close at 5,679.48 in September, marking its second consecutive monthly decline. All six sectors ended lower. Industrials (-7.14%) and Property (-6.46%) fell the most, and Services (-1.24%) held up best. SM (-9.95%), SMPH (-11.10%), and BPI (-7.00%) were the biggest drags, together taking about 118 points off the index. Other notable decliners included MER (-9.43%), RCR (-14.23%), MBT (-6.42%), JGS (-13.88%), and MONDE (-13.24%). ICT (+0.68%), AEV (+2.43%), and AC (+1.01%) were the largest positive contributors. During the month, the Philippine Stock Exchange approved the proposed IPO of Mynt, the parent company of GCash, with its listing scheduled for October 20. Foreign investors remained net sellers, recording Php8.436 billion in net outflows and bringing YTD net foreign selling to Php33.586 billion. The continued selloff pushed the PSEi's YTD performance to -6.17%, with the index trading at 8.39x forward P/E as of end-September.

Meanwhile, in the fixed-income market, the Philippine government bond yield curve shifted higher across all tenors during the month. The 2-year yield increased by 37.3 bps to 6.706%, while the 5-year and 10-year yields rose by 31.4 bps and 38.0 bps to 7.383% and 7.666%, respectively. The long end outperformed, with the 20-year and 25-year yields rising by a smaller 16.9 bps and 17.2 bps, respectively, resulting in a flatter curve. Government bond auctions reflected the upward pressure on yields. Early in the month, the Bureau of the Treasury (BTr) partially awarded the reissued FXTN 20-17 at an average yield of 7.218%. The same security was fully awarded later in the month at 7.438%, an increase of 22 bps. The BTr also partially awarded the reissued FXTN 10-71 and FXTN 10-74 at 7.352% and 7.525%, respectively, while bids for the reissued FXTN 07-70 were rejected. Towards the end of the month, the BTr launched the 2.5-year Retail Treasury Bond (RTB 32), setting the coupon at 6.875%. For Q4 2026, the BTr announced a borrowing calendar of up to Php892 billion, including Php430 billion in Treasury bonds.

Looking ahead, market sentiment is expected to remain sensitive to developments in the Middle East, particularly their impact on oil prices and inflation. With the US Federal Reserve having raised rates in September, investors will also be watching the BSP's policy meeting on October 22 for signs of further tightening. Against this backdrop, the Fund remains selective across asset classes. In equities, it maintains a balanced approach between value and growth opportunities to generate active returns over the long term. In fixed income, it seeks to enhance portfolio yield while carefully managing duration risk.
