INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Cash Fund intends to achieve a high level of liquidity and better earnings potential than those offered by regular savings deposit accounts and money market placements by investing in a diversified portfolio of deposits with a weighted average portfolio modified duration of not more than one (1) year. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM Index).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Cash Fund is suitable only for investors who:

- have a conservative risk appetite;
- are looking for a cash parking facility offering acceptable returns; and
- have an investment horizon of one (1) year or less.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The BPHILMM Index is a systematically designed, rules-based, market value-weighted index that measures the performance of short-term, fixed-rate and zero-coupon local currency securities that are publicly issued by the Philippines. It includes liquid money market instruments such as treasury bills with maturities of less than 1 year and minimum par amounts of Php3.0Bn. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, peso-denominated money market instruments with a similar investment horizon to the Fund.

OUTLOOK AND STRATEGY

In January, the peso yield curve bull steepened as weak gross domestic product (GDP) and within-target inflation strengthened expectations of monetary easing. Yields across the curve fell by 20 basis points (bps) on average, with the short end outperforming the rest of the curve. Rates in the 1 year and less tenors fell by 55 bps on average, with the 1-year rate ending at 5.7118%. Meanwhile rates in the belly went down by 15 bps on average, and the long-end rates jumped up 19 bps for the month. Total bond market trading activity picked up in January, rising by 53% versus December to Php1.190Tn, with Bangko Sentral ng Pilipinas (BSP) bills accounting for majority of 28% of trading activity at Php334.381Bn, followed by RTBs at 26% or Php311.996Bn.

Weaker-than-expected GDP growth was a key driver for the bond market, pointing to higher chances of policy rate cuts. The Philippine economy expanded 5.2% in Q4 2024, below the 5.4% forecast, bringing full-year growth to 5.6%. This fell short of the government's 6.0% to 6.5% target. Slower household spending and weak agricultural output due to adverse weather contributed to the slowdown, while government consumption rose 9.7%. Additionally, the latest inflation print from December came out at 2.9%, which was up from 2.5% in November. Nonetheless, the annual average inflation for 2024 settled at 3.2%, well within the government's target range of 2%-4% and significantly lower than 2023's 6.0%. December inflation increased mainly due to electricity, gas, and fuel. Core inflation, which excludes food and energy items, ticked up slightly to 2.8%.

In the local market, the Bureau of Treasury conducted auctions totaling Php104.8Bn bills and Php125Bn bonds (3, 5, 7, 10, and 25 years), all seeing strong demand. Bid-to-cover ratios averaged 3.35x for bills and 2.91x for bonds, with TAP facilities opened for 10- and 25-year issuances. Bond yields rose 22 bps on average from prior auctions, while bill rates fell 48 bps from December.

Looking ahead, the market will focus on inflation data, upcoming auctions, and the BSP's Monetary Board meeting, where a rate cut is expected due to softer GDP. The Fund remains opportunistic in acquiring time deposits to maximize yield while managing liquidity.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS
