INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Cash Fund intends to achieve a high level of liquidity and better earnings potential than those offered by regular savings deposit accounts and money market placements by investing in a diversified portfolio of deposits with a weighted average portfolio modified duration of not more than one (1) year. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM Index).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Cash Fund is suitable only for investors who:

- have a conservative risk appetite;
- are looking for a cash parking facility offering acceptable returns; and
- have an investment horizon of one (1) year or less.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The BPHILMM Index is a systematically designed, rules-based, market value-weighted index that measures the performance of short-term, fixed-rate and zero-coupon local currency securities that are publicly issued by the Philippines. It includes liquid money market instruments such as treasury bills with maturities of less than 1 year and minimum par amounts of Php3.0Bn. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, peso-denominated money market instruments with a similar investment horizon to the Fund.

OUTLOOK AND STRATEGY

In July, the peso yield curve slightly bull-flattened as inflation remained below the Bangko Sentral ng Pilipinas' (BSP) target range. Bond yields fell by 2 basis points (bps) on average, with both the short and long-end falling by 4 bps, while the belly rose by 2 bps. The 1-year rate declined by 5 bps to 5.6628%. Trading volume for July increased by 28.4% to Php1.327 trillion, with FXTNs accounting for majority or 38% of activity, followed by RTBs accounting for 24%. Trading volume for Bangko Sentral ng Pilipinas (BSP) bills fell by 16% as rates for the security continued to decline.

Headline inflation inched up to 1.4% in June from 1.3% in May, averaging 1.8% in 1H25, on higher housing, education, dining, and oil costs. Core inflation stayed at 2.2% for a fourth month, suggesting stable pressures. With this, BSP Governor Remolona noted that inflation remains manageable and hinted at potential rate cuts in 2025 rate depending on Q2 GDP figures. Meanwhile, the jobs market

stayed robust as unemployment eased to 3.9% in May, with labor force participation at 65.8% with services still the largest employer. OFW remittances rose 2.9% YoY to USD2.6B, bringing YTD inflows to USD15.3B, led by the U.S. On the trade front, President Trump and President Marcos Jr. signed a trade deal imposing a 19% U.S. tariff on Philippine exports, versus the original 20%, while granting tariff-free access for select American goods.

In the primary market, the Bureau of the Treasury (BTr) raised Php125 billion in bonds and Php113.6 billion in bills through weekly auctions, with strong demand reflected in average bid-to-cover ratios of 2.18x for bonds and 3.59x for bills. Bond auctions across 3, 5, 7, 10 and 20-year tenors saw rates flat versus prior issuances, while bill rates fell by an average of 8 bps from last month. The BTr also announced the 5-year jumbo RTB 31 offering starting August 5, with issuance slated for August 20. We expect the market to take its cue on the RTB pricing and upcoming macroeconomic data including inflation and Q2 GDP, and results of the BSP's Monetary Board meeting on August 28. To balance liquidity and returns, the Fund remains invested across various time deposits.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS
