### INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Cash Fund intends to achieve a high level of liquidity and better earnings potential than those offered by regular savings deposit accounts and money market placements by investing in a diversified portfolio of deposits with a weighted average portfolio modified duration of not more than one (1) year. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM Index).

### CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

**The Chinabank Cash Fund is suitable only for investors who:**

- have a conservative risk appetite;
- are looking for a cash parking facility offering acceptable returns; and
- have an investment horizon of one (1) year or less.

### KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The BPHILMM Index is a systematically designed, rules-based, market value-weighted index that measures the performance of short-term, fixed-rate and zero-coupon local currency securities that are publicly issued by the Philippines. It includes liquid money market instruments such as treasury bills with maturities of less than 1 year and minimum par amounts of Php3.0Bn. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, peso-denominated money market instruments with a similar investment horizon to the Fund.

**OUTLOOK AND STRATEGY**

In November, the peso yield curve steepened on the back of lower than expected GDP growth. The short-end outperformed as rates for 1-year and below declined by 5 basis points (bps) on average, with the 1-year rate fetching 5.0711%, down 6 bps from last month. Meanwhile, rates in the belly and long-end rose by 1 bp on average, with the 10-year rate up 4 bps to 5.9364%. Trading activity for the month was up 18% to Php1.782 trillion, with FXTNs continuing to be the largest at 46% of volume, followed by RTBs at 34%.

Inflation remained subdued at 1.7% yoy in October as slower food price increases offset higher utility costs, while core inflation eased. GDP growth slowed to 4.0% yoy in Q3, the weakest in nearly five years, weighed down by delays in public infrastructure spending and softer consumption, though private construction and services provided support. These give room for the Bangko Sentral ng Pilipinas

(BSP) to continue policy easing heading into its final rate-setting meeting for the year in December. Meanwhile, overseas Filipino cash remittances stayed resilient, rising 3.7% year-on-year to USD3.1 billion in September, and is expected to support household consumption and growth in Q4. Additionally, S&P Global affirmed the Philippines' 'BBB+' long-term rating with a positive outlook, citing fiscal consolidation, stabilizing debt, and strong external position. It expects external strength, healthy growth, and improved fiscal performance over the next 12-24 months.

In the primary market, the Bureau of the Treasury (BTr) raised a total of Php70 billion from its bond auctions and Php97 billion from its bill auctions. The auctions attracted strong demand, averaging bid-to-cover ratios of more than 3 times. Bill rates continued to fall by an average of 6 bps versus last month, while bond rates in the dual tranche auctions of 5 and 10 years and 7 and 20 years fell by 8 bps on average. Looking ahead, the market will take its cue from BSP and Fed policy movements and their messaging in their upcoming December meetings, along with key macroeconomic data. With this, the Fund continues to invest in various time deposits to balance liquidity and returns.

## INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Deposits with local banks, including those of the Trustee's own bank;
- b) Deposits with foreign banks or their Philippine branches or any financial institution in any foreign country; and
- c) Such other tradable investment outlets/categories as the Bangko Sentral ng Pilipinas (BSP) may allow.
