INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Dollar Cash Fund intends to achieve liquidity and to potentially earn higher than USD time deposits by investing in fixed income securities of mostly time deposits, special savings accounts and government securities with a weighted average portfolio modified duration of not more than one (1) year. The Fund aims to outperform its benchmark which is the Bloomberg US Treasury Bills 3-6 Months Index.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Dollar Cash Fund is suitable only for investors who:

- have a conservative risk appetite;
- are seeking a high level of liquidity with returns better than deposits; and,
- have an investment horizon of one (1) year or less.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

- **THE UITF IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED NOR GOVERNED BY THE PDIC.**
- **THE UITF IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUST ENTITY OR ITS AFFILIATES OR SUBSIDIARIES.**
- **DUE TO THE NATURE OF THE INVESTMENTS OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED. HISTORICAL PERFORMANCE, WHEN PRESENTED, IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.**
- **ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.**
- **THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**
- **THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF'S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.**

The Bloomberg US Treasury Bills 3-6 Months Index is a US Dollar-denominated, unhedged, market value-based index that tracks the market for treasury bills with maturities of 3 to less than 6 months and issued by the United States government. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, short-term, dollar denominated money market placements with a similar investment horizon to the Fund.

OUTLOOK AND STRATEGY

In May, the U.S. Treasury yield curve bear flattened on the back of persistent inflation. Yields rose across most tenors but with larger increases at the short-end. Yields increased by roughly 5 basis points (bps) on average, with the 2-year rate rising by 10 bps to 3.98% and the 10-year rate increasing by 5 bps to 4.45%. This narrowed the 2s10s spread to 47 bps from 52 bps at end-April. The belly saw more pronounced upward movement of 11 bps, reflecting a modest repricing of Fed expectations, while the long end moved more moderately by 2 bps. In contrast to April's rally, ROP yields increased across all tenors averaging 9 bps, led by the short-end and belly.

U.S. headline inflation and PCE accelerated to 3.8% year-on-year (yoy) in April, driven by higher energy prices from the Iran conflict. Core PCE climbed 3.3%, driving expectations of potential Fed tightening. Producer prices also surprised to the upside, rising 6.0% yoy, signaling broad-based cost pass-through. Despite some softening in labor indicators such as slower payroll growth and rising job cuts, economic activity remained firm, as manufacturing PMI rose to 55.3 in May from 54.5, the strongest since May 2022, while Composite PMI was steady at 51.7. Additionally, 1Q2026 GDP growth was revised down from 2.0% annualized to 1.6%, as gains in equipment investment and services were offset by a drag from net trade.

Amidst this backdrop, minutes from April's Federal Open Market Committee (FOMC) meeting indicated that policymakers are of the view that additional rate increases may be needed if inflation stays elevated. Kevin Warsh's formal assumption of the US Fed Chair role also adds uncertainty to the policy outlook. With this, the market continues to monitor policy rate guidance, along with developments on the geopolitical front and key macroeconomic releases. The Fund continues to invest in various time deposits to maintain liquidity while maximizing returns.
