INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Equity Fund intends to achieve capital appreciation by investing in a diversified portfolio of choice equity issues listed in the Philippine Stock Exchange (PSE). Up to 100% of the Fund may be invested in equity issues at any point in time. The Fund aims to outperform its benchmark which is the Philippine Stock Exchange PSEi Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Equity Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and,
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 95% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in equities issued by prime companies which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPU and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The Fund's benchmark was amended to 100% PSEi TRI effective August 1, 2024, which is more aligned with the investment objective and strategy of the Fund. Prior to this, the Fund's benchmark was amended to 95% PSEi TRI + 5% BPHILMM from 95% PSEi + 5% BPHILMM effective January 1, 2024, in compliance with BSP Circular No. 1178 (Guidelines on the Use of Benchmarks or Unit Investment Trust Funds) on the use of a total return benchmark that will more adequately represent the performance of the Fund.

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the Index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on www.pse.com.ph/indices.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the performance of the Philippine equities market as represented by the PSEi TRI. The benchmark's characteristics, including its composition and the corresponding weights of its constituents, serve as a reference point for the Fund's allocation and security selection profile.

²**Volatility** measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

³**Sharpe Ratio** is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

⁴**Information Ratio** measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

OUTLOOK AND STRATEGY

Movements of risk assets globally continued to be influenced by news regarding U.S. President Donald Trump's trade policies. In March, the MSCI All-Country World Equity Index and the S&P 500 Index declined by 4.14% and 4.18%, respectively. Recently, there have been increasing discussions about the risk of potential stagflation in the world's largest economy. The U.S. Federal Reserve appears to validate these expectations, as its summary of economic projections for 2025 shows a downgrade in its GDP estimate from 2.10% to 1.70%. At the same time, the central bank raised its inflation forecast, with core CPI now expected to reach 2.80%, up from the previous 2.50%.

Notably, the local equities market performed better. The Philippine Stock Exchange Index (PSEi) gained 182.75 points, or 3.05%. Foreign funds were net buyers, adding PHP 2.85 billion worth of positions during the month. The market reacted positively as the Philippine Statistics Authority reported that the inflation reading for February was better than expected at 2.10%, down from January's 2.90%. With inflation well within the Bangko Sentral ng Pilipinas' target range, the market is increasingly convinced that an interest rate cut may occur as early as April. All sectors advanced, with Mining and Oil (+22.25%), Property (+4.72%), and Financials (+4.39%) gaining the most, while Holding Firms (+2.96%), Services (+1.29%), and Industrials (+1.21%) also posted gains. Individually, CNVRG (+22.68%), MER (+15.40%), SMPH (+7.62%), CBC (+7.51%), and LTG (+7.44%) led the index gainers. On the other hand, CNPF (-9.53%), JFC (-6.69%), AGI (-6.46%), BLOOM (-6.17%), and SCC (-5.62%) were among the decliners. Corporate earnings results supported the PSEi's performance. By the end of March, 25 of the 30 index members had released their FY 2024 earnings figures. By our count, 7 were ahead, 10 were in line, and 8 were behind consensus expectations. On an index-weighted basis, earnings grew by 15.33%, aligning with market expectations. For 2025, the consensus estimate currently stands at around 10%.

Despite positive local developments, the evolution of Trump's trade war may limit the potential for a more sustained rally in equities. On April 2, Trump is set to unveil his reciprocal tariff updates, an event that he refers to as "Liberation Day". Meanwhile, the PSEi's valuation remains at historically low levels. Using forward 2025 earnings estimates, the PSEi's P/E ratio currently stands at just 9.55x, a figure similar to levels seen during periods of significant market stress in 2008 and 2020. To balance the market's risk and reward opportunities, the Fund will remain selective in its equity positioning, weighing value and growth considerations, among others.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Equities listed in the PSE;
- b) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
