INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Equity Fund intends to achieve capital appreciation by investing in a diversified portfolio of choice equity issues listed in the Philippine Stock Exchange (PSE). Up to 100% of the Fund may be invested in equity issues at any point in time. The Fund aims to outperform its benchmark which is the Philippine Stock Exchange PSEi Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Equity Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and,
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 95% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in equities issued by prime companies which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPU and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the Index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on www.pse.com.ph/indices.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the performance of the Philippine equities market as represented by the PSEi TRI. The benchmark's characteristics, including its composition and the corresponding weights of its constituents, serve as a reference point for the Fund's allocation and security selection profile.

OUTLOOK AND STRATEGY

The Philippine Stock Exchange Index (PSEi) saw another volatile month in November. The market came under pressure early in the month as the country's Q3 GDP growth stood at 4.0%, the slowest in nearly five years, due to delays in public works and weaker household consumption. Meanwhile, the peso briefly hit a new all-time low of 59.185 against the US dollar, pressured by ongoing

corruption investigations and the projected policy rate differential between the BSP and the US Federal Reserve (Fed). At its lowest point, the index dropped to 5584, reflecting a 5.83% decline for the month, and P/E valuations contracted to 9.06x. By mid-month, bargain hunting helped stabilize the market. Sentiment improved as the currency recovered modestly to 58.635 toward the end of the month, supported by S&P Global's reaffirmation of the Philippines' sovereign credit rating. The PSEi eventually reversed its losses and closed November up by 1.55% at 6022.

Sector performance was generally positive, with Mining and Oil (+7.50%), Services (+4.89%), Property (+2.44%), Financials (+2.17%), and Holding Firms (+0.76%) posting gains. Industrials (-2.72%) were the only sector in the red, due to weakness in food manufacturers and restaurant companies. At the stock level, CNVRG (+22.26%), SMC (+21.77%), PLUS (+16.95%), CNPF (+15.43%), and TEL (+15.36%) outperformed, while URC (-13.70%), JFC (-11.78%), MONDE (-9.48%), JGS (-8.98%), and SCC (-8.49%) underperformed. Corporate earnings were mixed, with 9M 2025 results showing 11 index members in line with consensus, 9 ahead, and 10 below expectations. In the primary market, newly listed MYNLD, valued at Php34.3 billion, was well received and closed the month higher by 5.73%. Meanwhile, ALI completed a Php4.19 billion accelerated share placement of AREIT ahead of planned property infusions, with strong interest from long-only investors.

Despite the month's uptick, the PSEi remains down 7.70% year to date. Whether the market can build on its recent momentum heading into year-end will depend mainly on near-term catalysts. Investors continue to watch developments related to the infrastructure spending investigation and the government's commitment to take action against those allegedly involved, which will be key to restoring confidence. Meanwhile, the Fund remains selective in its positioning, maintaining a balanced approach between value and growth opportunities to generate active returns.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Equities listed in the PSE;
