INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Equity Fund intends to achieve capital appreciation by investing in a diversified portfolio of choice equity issues listed in the Philippine Stock Exchange (PSE). Up to 100% of the Fund may be invested in equity issues at any point in time. The Fund aims to outperform its benchmark which is the Philippine Stock Exchange PSEi Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Equity Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 95% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

- THE UITF IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED NOR GOVERNED BY THE PDIC.
- THE UITF IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUST ENTITY OR ITS AFFILIATES OR SUBSIDIARIES.
- DUE TO THE NATURE OF THE INVESTMENTS OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED. HISTORICAL PERFORMANCE, WHEN PRESENTED, IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.
- ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.
- THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.
- THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF'S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.

<sup>2</sup>**Volatility** measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

<sup>3</sup>**Sharpe Ratio** is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

<sup>4</sup>**Information Ratio** measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

The Fund's benchmark was amended to 100% PSEi TRI effective August 1, 2024, which is more aligned with the investment objective and strategy of the fund. Prior to this, the fund's benchmark was amended to 95% PSEi TRI + 5% BPHILMM from 95% PSEi + 5% BPHILMM effective Jan 1,2024, in compliance with BSP Circular No. 1178 (Guidelines on the Use of Benchmarks for Unit Investment Trust Funds) on the use of a total return benchmark that will more adequately represent the performance of the Fund.

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the Index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on [www.pse.com.ph/indices](http://www.pse.com.ph/indices).

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the performance of the Philippine equities market as represented by the PSEi TRI. The benchmark's characteristics, including its composition and the corresponding weights of its constituents, serve as a reference point for the Fund's allocation and security selection profile.

OUTLOOK AND STRATEGY

During the first few days of trading, the Philippine Stock Exchange Index (PSEi) managed to close above the 7500 resistance level, a 52-week high, supported by continued net foreign buying. The buying streak extended to 27 consecutive days going back the previous month. From there, sellers were seen taking advantage of the attractive levels to lock-in profits. One of the primary reasons for the weaker sentiment was the steady increase in US treasury yields in response to the market uncertainties about economic impact of the tightly contested presidential election. Additionally, the conflict in the Middle East between Israel and Iran induced increased volatility in the oil markets. The 10Y US treasury yield climbed by nearly 50bps from 3.78% to 4.28% likely as markets made adjustments on inflation expectations. Meanwhile, the 2Y US treasury yield gained 52bps as well, climbing from 3.64% to 4.16%, as market participants adjust their expectations on the Federal Reserve's (Fed) next policy move. As of this writing, the market is expecting the Fed to cut by 25bps, following the jumbo 50bps cut last September. The steady climb in yields resulted in the strengthening of the US dollar, with the Peso depreciating from 55.98 to 58.33. The local currency's depreciation overshadowed the narrative that Bangko Sentral ng Pilipinas (BSP) remains confident on the downward path of inflation, as suggested by their decision to reduce policy rates by 25bps to 6.00%.

Overall, the PSEi declined by 129.69pts or -1.78% to close at 7142.96 in October. This brought the local market's year-to-date performance to +10.74%. In terms of total activity, the average daily traded volume for the month clocked in at Php5Bn, keeping pace with the year's average. Relatedly, despite showing a mixed picture, foreign activity still ended with a net foreign buying worth \$21.71M, increasing the year-to-date tally to \$43.9M. On the earnings front, 7 out of the 30 index members have released their Q3 and 9M2024 report cards so far. By our count, 2 were ahead (BPI, MER), 3 were in-line (BDO, MBT, AEV), and 2 were behind (SCC, WLCON) consensus expectations. In terms of sector performance, Property (-4.68%), Services (-2.67%), Holding Firms (-1.84%), and Mining and Oil (-0.25%) pulled the market lower. On the other hand, Financials (+1.49%) and Industrials (+1.44%) bucked the trend as strong earnings results provided support. As a whole, index breadth was negative with decliners outnumbering advancers 21 – 9. In terms of individual stock performance, JGS (-12.59%), WLCON (-12.02%), ALI (-10.66%), ACEN (-7.62%), and AEV (-6.06%) led the list of underperformers. Meanwhile, MER (+11.82%), CNPF (+10.38%), SCC (+8.03%), MONDE (+7.07%), and BPI (+6.00%) rounded the list of outperformers.

With the market correction seen recently, the 7000 area may be expected as the next level of support. To the upside meanwhile, the 7500 area remains a formidable resistance, which has held since 2021. The following month brings plenty of market moving events which may dictate where the market is headed next. These include the results of the US elections and Fed's monetary policy decision. Additionally, the remaining index members are scheduled to complete their earnings updates. On valuations, the index closed the month trading at a P/E of 12.25x or an earnings yield of 8.10% relative to 2024 consensus earnings expectations.
