INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Fixed Income Fund intends to achieve a steady stream of income by investing in a diversified portfolio of high-grade marketable fixed income securities such as government securities, tradable corporate bonds and notes of varying tenors as well as bank deposits, money market placements and BSP securities with a weighted average portfolio modified duration of not more than ten (10) years. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index 5+ Year (BPHIL5 Index).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Fixed Income Fund is suitable only for investors who:

- have a moderate risk appetite;
- are looking for higher yields;
- are willing to take the attendant risks that come with portfolios that may have investments with longer tenors; and,
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPU and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The BPHIL5 Index is a systematically designed, rules-based, market value-weighted index that measures the performance of long-term, fixed-rate local currency securities that are publicly issued by the Philippines. It includes a diversified range of fixed income securities with different coupon rates, maturities of 5 years or more, minimum par amounts of Php3.0Bn, and are traded in the Philippine market. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the market or asset class the Fund represents. The benchmark reflects the performance of peso-denominated fixed income securities with maturities of 5 years or more. Additionally, its characteristics serve as reference point for the Fund's duration and credit positioning.

OUTLOOK AND STRATEGY

The local yield curve bull flattened in August. The 2-year benchmark yield declined by 6 bps to 5.63%, while the 10-year dropped by 18 bps to 6.03%. Longer tenors fell by an even larger 22 bps during the month. At the Jackson Hole Symposium, US Federal Reserve Chair Jerome Powell signaled openness to resuming rate cuts, with markets now pricing in at least 50 bps of reductions for the rest of the year. On the domestic front, the BSP resumed monetary easing with a 25 bps cut, bringing the policy rate to 5.00%. BSP Governor Eli Remolona noted that rates are approaching a "Goldilocks" zone, neither too tight nor too loose, and that one more cut in 2025 is possible, though the timing remains data dependent.

In the auction space, the Bureau of the Treasury (BTr) raised Php507.16B from the 31st tranche of Retail Treasury Bonds (RTB 31), which carries a 6% coupon and 5-year maturity. The offering, conducted in the first half of the month, drew strong participation, generating Php425.51B in new money and Php81.65B from bond exchange. Regular auctions also saw healthy demand. The 10-year FXTN 10-73 was

awarded at 5.997% with a 3.96x bid-to-cover ratio, raising the full Php25B target. In the final week, a dual-tranche auction was held with the 3-year FXTN 07-64 clearing at 5.634% with a solid 9.3x coverage, while the 25-year FXTN 25-12 was awarded at 6.374% with a more modest 1.41x coverage but still raised the full Php25B allocation. Looking ahead, the BTr plans to issue Php30B each of 5-year and 7-year papers, Php25B of 10-year, and Php35B in aggregate for 3-year and 20-year papers in the coming month.

Following August's movements, yields up to the 10-year tenor are now lower compared to the previous year. Year-to-date, the 2-year yield has fallen by 42 bps, while the 10-year yield has declined by 13 bps. Against this backdrop, the Fund will continue to be selective in bond acquisitions, seeking to enhance portfolio yield while carefully managing duration risk.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- b) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds, notes and preferred shares which are classified as debt securities under appropriate accounting standards;
- c) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks or their Philippine branches or any financial institution in any foreign country;
- d) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- e) Such other tradable investment outlets/categories as the BSP may allow.
