INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank High Dividend Equity Fund intends to achieve long-term capital appreciation by investing in a diversified portfolio of choice common and preferred equity issues listed in the Philippine Stock Exchange (PSE) which have a regular dividend payment policy and/or dividend payment track record. Up to 100% of the Fund may be invested in equity issues at any point in time. The Fund aims to outperform its benchmark which is the Philippine Stock Exchange PSEi Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank High Dividend Equity Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and,
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 95% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in equities issued by prime companies which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPU and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The Fund's benchmark was amended to 100% PSEi TRI effective August 1, 2024, which is more aligned with the investment objective and strategy of the Fund. Prior to this, the Fund's benchmark was amended to 95% PSEi TRI + 5% BPHILMM from 95% PSEi + 5% BPHILMM effective January 1, 2024, in compliance with BSP Circular No. 1178 (Guidelines on the Use of Benchmarks for Unit Investment Trust Funds) on the use of a total return benchmark that will more adequately represent the performance of the Fund.

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the Index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on www.pse.com.ph/indices.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the performance of the Philippine equities market as represented by the PSEi TRI. The benchmark's characteristics, including its composition and the corresponding weights of its constituents, serve as reference point for the Fund's allocation and security selection profile.

²**Volatility** measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

³**Sharpe Ratio** is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

⁴**Information Ratio** measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper, amounting to Php2.04 million, which were approved by the Board of Directors/Trust Investment Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

There were plenty of market drivers during the month of February. Early in the month, the Congress passed the Capital Markets Efficiency Promotion Act bill. This bill includes a measure that seeks to reduce stock transaction tax from 0.6% to 0.1%, which aims to improve liquidity in the stock market. Separately, against consensus, the Bangko Sentral ng Pilipinas (BSP) surprised when they decided to hold policy rates steady at 5.75%, citing that uncertainties from global trade developments influenced the decision. Meanwhile, the Philippines was finally removed from the Financial Action Task Force's grey list, signaling improvements in the country's anti-money laundering and counter-terrorism financing measures. Later in the month, the BSP announced a 200bps reduction in reserve requirement ratios for banks to 5%, aiming to boost liquidity in the local economy. Overseas, US President Trump announced that the 25% tariffs on imports from Canada and Mexico, as well as the additional 10% tariff on China will take effect on March 4th after a month long suspension.

The Philippine Stock Exchange Index (PSEi) gained +135.38pts or +2.31% to close at the 5997.97 level. In terms of sector performance, Mining and Oil (+12.43%), Industrials (+6.10%), Financials (+4.68%), Holding Firms (+1.05%), and Services (+0.70%) advanced. On the other hand, Property (-2.42%) bucked the trend being the sole decliner. In terms of market activity the average daily traded volume was registered a Php6.10Bn, higher compared to the previous month's Php4.88Bn. The last day of trading was again dominated by rebalancing related flows, this time on the MSCI Index wherein JGS and URC were relegated from the standard to the small cap index. After all these, foreign funds still ended as net sellers, liquidating Php8.41Bn worth of positions which pushed the year-to-date total to Php15.07Bn.

After the month's moderate recovery, the PSEi's year-to-date performance ended at -8.13%. Valuations meanwhile ended at 10.50x relative to 2024 corporate earnings estimates. Further on earnings, 10 out of the 30 index members reported their full year 2024 figures. By our count, 6 were in line (BPI, GLO, MBT, SMPH, BDO, and CBC), 3 were ahead (ALI, AREIT, and MER), and 1 was behind (TEL) consensus earnings expectations. These names account for around 49.30% of the index with the weighted earnings growth figure coming in at +15.59% compared to the previous year so far. With earnings generally supportive, combined with attractive valuations, the Fund will keep its cash level to a minimum.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Equities listed in the PSE which have a regular dividend payment policy and/or track record or regular dividend payments;
- b) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- c) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds and notes;
- d) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks of their Philippine branches or any financial institution in any foreign country;
- e) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- f) Such other tradable investment outlets/categories as the BSP may allow.
