INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank High Dividend Equity Fund intends to achieve long-term capital appreciation by investing in a diversified portfolio of choice common and preferred equity issues listed in the Philippine Stock Exchange (PSE) which have a regular dividend payment policy and/or dividend payment track record. Up to 100% of the Fund may be invested in equity issues at any point in time. The Fund aims to outperform its benchmark which is the Philippine Stock Exchange PSEi Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank High Dividend Equity Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and,
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 95% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in equities issued by prime companies which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPU and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the Index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on www.pse.com.ph/indices.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the performance of the Philippine equities market as represented by the PSEi TRI. The benchmark's characteristics, including its composition and the corresponding weights of its constituents, serve as reference point for the Fund's allocation and security selection profile.

OUTLOOK AND STRATEGY

The Bangko Sentral ng Pilipinas eased policy rates by 25 basis points in February, bringing the benchmark rate to 4.25%, citing manageable inflation but signaling increasing concerns over slowing economic growth. The previous month's inflation reading came in at 2.0% year-on-year, while the BSP projected February's figure to fall within the 2.3%–3.1% range. Meanwhile, on the currency front, the Philippine peso strengthened against the US dollar, with the pair trading at 57.69 compared with 58.90 in the prior month.

The currency's strength supported the local equities market, helping drive net foreign buying of Php8.36 billion and bringing the year-to-date total to Php21.72 billion. The Philippine Stock Exchange Index (PSEI) continued its upward trend, gaining 282.27 points or 4.46% in February. This brought the year-to-date performance to 9.22%. In terms of sector performance, Services (+10.28%) led the gains, followed by Mining and Oil (+5.13%), Industrials (+5.07%), Holding Firms (+3.97%), and Financials (+0.78%), while Property (-0.16%) slightly lagged. Among individual stocks, top gainers included PLUS (+22.71%), AC (+18.58%), PGOLD (+17.32%), MONDE (+15.61%), and URC (+12.68%). PLUS advanced despite regulatory uncertainty surrounding gaming companies, supported by strong share purchases from management. Consumer-oriented companies, including retailers and manufacturers, benefited from inflation remaining within the target range. On the other hand, decliners included SMC (-15.11%), SCC (-11.95%), DMC (-10.65%), CNVRG (-7.10%), and BPI (-6.45%). Weakness in SCC and DMC followed the Department of Energy's decision to reject their request to extend the coal operating contract by another 13 years, citing the 50-year contractual limit, and instead opening it for competitive bidding.

Measured against the 2025 lows, the PSEI has recovered by 18.39%, nearing the technical threshold for a bull market. However, the escalation of tensions in the Middle East toward the end of February risks reigniting market volatility, especially through higher oil prices and renewed inflationary pressures. Meanwhile, corporate earnings continue to support equities, with several index members already reporting their FY2025 results. BPI and CBC posted earnings growth of 7% and 13%, respectively. Property companies SMPH and ALI reported core earnings growth of 7% and 8%, while telecom operators GLO and TEL delivered relatively flat results at -3% and 1%, respectively. MER was a notable outperformer with earnings growth of 12%. With earnings season still underway, more index constituents are scheduled to announce their results in the coming month. Against this backdrop, the Fund remains selective in its positioning, maintaining a balanced approach between value and growth opportunities to generate active returns.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Equities listed in the PSE which have a regular dividend payment policy and/or track record or regular dividend payments;
- b) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- c) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds and notes;
- d) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks of their Philippine branches or any financial institution in any foreign country;
- e) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- f) Such other tradable investment outlets/categories as the BSP may allow.
