INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank High Dividend Equity Fund intends to achieve long-term capital appreciation by investing in a diversified portfolio of choice common and preferred equity issues listed in the Philippine Stock Exchange (PSE) which have a regular dividend payment policy and/or dividend payment track record. Up to 100% of the Fund may be invested in equity issues at any point in time. The Fund aims to outperform its benchmark which is the Philippine Stock Exchange PSEi Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank High Dividend Equity Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and,
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations. Given that the Fund may be invested up to 100% in equity issues at any point in time, investors are deemed to be more exposed to this risk.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in equities issued by prime companies which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPU and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the Index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. This Index is not adjusted for tax by the Trustee and does not reflect deductions for fees and expenses. Additional information on PSEi TRI and/or its administrator is available on www.pse.com.ph/indices.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the performance of the Philippine equities market as represented by the PSEi TRI. The benchmark's characteristics, including its composition and the corresponding weights of its constituents, serve as reference point for the Fund's allocation and security selection profile.

OUTLOOK AND STRATEGY

Market sentiment remained subdued during the month amid concerns over slowing economic growth, elevated inflation, and persistent geopolitical tensions in the Middle East. First-quarter GDP growth slowed to 2.8%, its weakest pace since the pandemic, as household consumption moderated and investments contracted. Meanwhile, April inflation accelerated to 7.2%, exceeding both market expectations and the BSP's forecast range, driven largely by higher transport and food prices. Overseas, diplomatic efforts to extend the ceasefire

between the US and Iran continued during the month. However, commercial traffic through the Strait of Hormuz remained well below normal levels, posing ongoing risks to global energy supply and inflation.

The Philippine Stock Exchange Index (PSEi) declined by 1.11% in May, closing at 5,768.76 and bringing year-to-date returns to -4.69%. Sector performance was broadly negative during the month, led by Industrials (-4.80%), Property (-2.51%), Holding Firms (-2.12%), and Financials (-0.66%). In contrast, Services (+2.41%) and Mining & Oil (+2.36%) posted gains. Among index constituents, PLUS (-22.68%), JFC (-19.52%), CNVRG (-13.39%), MER (-12.50%), and CBC (-8.49%) were the largest decliners. PLUS and CNVRG weakened amid speculation surrounding their potential removal from the PSEi during the upcoming index rebalancing. JFC and MER were adversely affected by MSCI-related outflows, with JFC being reclassified to the Small Cap Index and MER experiencing a reduction in index weight following a decline in free float. JFC's first-quarter earnings also fell short of expectations as margin pressures more than offset strong revenue growth. On the other hand, ACEN (+18.11%), AEV (+9.28%), ICT (+5.99%), LTG (+5.33%), and RCR (+5.23%) led the gainers. ICT reached new all-time highs following the BSP's decision to increase the single-issuer exposure limit for UITFs from 15% to 20%. The company's first-quarter core earnings grew strongly by 29% year-on-year, while management maintained its \$740 million capital expenditure program for the year. Foreign investors remained net sellers during the month, with net outflows totaling Php9.26 billion, of which Php6.67 billion occurred on the final trading day due to MSCI rebalancing activities. On the earnings front, first-quarter earnings growth of PSEi constituents moderated to 3.63%. Reflecting the challenging macroeconomic backdrop, consensus 2026 earnings growth expectations have been revised lower from 5.59% to just 0.86%.

Looking ahead, market performance is expected to remain sensitive to geopolitical developments and their impact on growth, inflation, and ultimately corporate earnings. While valuations remain attractive relative to historical levels, with the PSEi trading at approximately 9x forward earnings, earnings expectations have softened materially, which may constrain valuation re-rating in the near term. In this environment, the Fund remains selective in positioning, maintaining a balanced approach between value and growth opportunities to generate active returns over the long term.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Equities listed in the PSE which have a regular dividend payment policy and/or track record or regular dividend payments;
- b) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- c) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds and notes;
- d) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks of their Philippine branches or any financial institution in any foreign country;
- e) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- f) Such other tradable investment outlets/categories as the BSP may allow.
