### INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Intermediate Fixed Income Fund intends to achieve income in the intermediate-term by investing in a diversified portfolio of high-grade marketable fixed income securities comprised of deposits issued by banks and other financial institutions including, the BSP securities, tradable money market instruments, government securities, corporate bonds and notes with a weighted average portfolio modified duration of not more than three (3) years, and preferred shares which are classified as debt securities. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index 1 to 3 Year (BPHIL13 Index).

### CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

**The Chinabank Intermediate Fixed Income Fund is suitable only for investors who:**

- have a moderate risk appetite;
- are willing to assume a certain level of risk in consideration for higher returns; and
- have an investment horizon of at least three (3) years.

### KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The BPHIL13 Index is a systematically designed, rules-based, market value-weighted index that measures the performance of intermediate-term, fixed-rate local currency securities that are publicly issued by the Philippines. It includes a diversified range of fixed income securities with different coupon rates, maturities of between 1 to 3 years, minimum par amounts of Php3.0Bn, and are traded in the Philippine market. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the market or asset class the Fund represents. The benchmark reflects the performance of peso-denominated fixed income securities with maturities of between 1 to 3 years. Additionally, its characteristics serve as reference point for the Fund's duration and credit positioning.

#### OUTLOOK AND STRATEGY

The local yield curve steepened in January. Yields in the intermediate term declined by an average of 28bps, while those of medium-term bonds eased by a more modest 11bps. On the other hand, long term bond yields increased by an average 20bps. Movements on the shorter end was influenced by increased bets that the Bangko Sentral ng Pilipinas (BSP) will cut interest rates in their next meeting, as the disappointing growth figures for 2024 supported the case for easing. Philippine GDP for 2024 came in at 5.60%, behind the lower end of the government's target, as household consumption softened.

Earlier in the month, the Philippine Statistics Authority reported that local inflation averaged 3.2%, comfortably within the government's 2-4% target and significantly lower than the 6% seen the previous year. Meanwhile, additional bond supply played a factor on the movement of bonds with longer tenors. For the month, the Bureau of the Treasury (BTr) held a number of bond auctions. A Php30B offering of a 7Y paper was first on the calendar. This fetched an average yield of 6.249%, with bid to cover ratio at 1.80x. A similar sized 10Y paper was on offer the following week, which was then priced at an average of 6.251%. The bid to cover on the issue was strong at 3.11x. This prompted the BTr to open a tap facility window for an additional Php10B which again was met with strong demand. On the final week of January, a dual tranche offering of 3Y and 25y papers was held. The Php15B 3Y paper was priced at 5.894%, with bid to cover at a healthy 4.97x. Meanwhile, the new 25y paper sized at Php20B was priced at 6.334%. Bid to cover was 2.30x which was enough for the BTr to open a tap facility window for an additional Php5Bn. Demand was more muted in the afternoon with bid to cover at 1.42x.

In the coming month, the BTr is scheduled to auction off Php30B each of bonds with 5Y, 7Y, and 10Y remaining life, followed by a 20Y paper sized at Php20Bn. Separately, the BSP will hold its first monetary board meeting, where the consensus expectations is for them to bring the policy rates to lower to 5.50% from 5.75%. Accordingly, the Fund will stay opportunistic on acquisitions to gradually build-up the portfolio yield.

## INVESTMENT POLICY / PROSPECTIVE INVESTMENTS
