### INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Intermediate Fixed Income Fund intends to achieve income in the intermediate-term by investing in a diversified portfolio of high-grade marketable fixed income securities comprised of deposits issued by banks and other financial institutions including, the BSP securities, tradable money market instruments, government securities, corporate bonds and notes with a weighted average portfolio modified duration of not more than three (3) years, and preferred shares which are classified as debt securities. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index 1 to 3 Year (BPHIL13 Index).

### CLIENT SUITABILITY

*A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.*

**The Chinabank Intermediate Fixed Income Fund is suitable only for investors who:**

- have a moderate risk appetite;
- are willing to assume a certain level of risk in consideration for higher returns; and
- have an investment horizon of at least three (3) years.

### KEY RISKS AND RISK MANAGEMENT

*The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.*

- Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

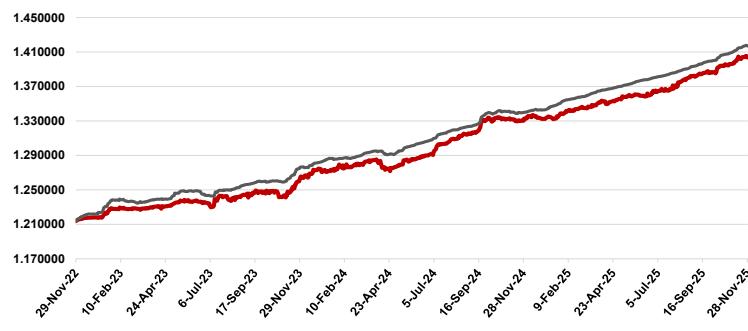

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPU and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

- THE UITF IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED NOR GOVERNED BY THE PDIC.**
- THE UITF IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUST ENTITY OR ITS AFFILIATES OR SUBSIDIARIES.**
- DUE TO THE NATURE OF THE INVESTMENTS OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED. HISTORICAL PERFORMANCE, WHEN PRESENTED, IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.**
- ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.**
- THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**
- THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF'S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.**

The BPHIL13 Index is a systematically designed, rules-based, market value-weighted index that measures the performance of intermediate-term, fixed-rate local currency securities that are publicly issued by the Philippines. It includes a diversified range of fixed income securities with different coupon rates, maturities of between 1 to 3 years, minimum par amounts of Php3.0Bn, and are traded in the Philippine market. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a standard for evaluating the Fund's performance by helping investors/participants understand how the Fund is performing relative to the market or asset class the Fund represents. The benchmark reflects the performance of peso-denominated fixed income securities with maturities of between 1 to 3 years. Additionally, its characteristics serve as reference point for the Fund's duration and credit positioning.

### OTHER DISCLOSURES

#### RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper, amounting to Php12.01 million, which were approved by the Board of Directors/Trust Investment Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

#### OUTLOOK AND STRATEGY

The local yield curve continued to steepen in November. The 2-year yield dropped by 18bps to 5.2054%, while the 10-year yield remained unchanged at 5.9324%. Longer-term bonds edged lower by up to 4bps. Softer macroeconomic indicators drove these changes, as as the country's Q3 GDP growth slowed to 4.0%, its slowest pace in nearly five years, due to delays in public works and weaker household consumption. Inflation eased further to 1.70%, falling below the Bangko Sentral ng Pilipinas (BSP) target range and boosting expectations of another policy rate cut. Meanwhile, the peso briefly hit a new all-time low of 59.185 against the US

<sup>2</sup>**Volatility** measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

<sup>3</sup>**Sharpe Ratio** is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

<sup>4</sup>**Information Ratio** measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

dollar, pressured by ongoing corruption investigations and the projected policy rate differential between the BSP and the US Federal Reserve (Fed). The currency recovered modestly to 58.635 toward the end of the month, supported by S&P Global's reaffirmation of the Philippines' sovereign credit rating. Year-to-date, the yield curve has steepened significantly, with the 2-year and 10-year yields down 84 basis points and 23 basis points, respectively.

Demand for safe-haven assets remained strong. In auction space, the Bureau of the Treasury (BTr) held two dual-tranche auctions during the month. The 5-year FXTN 07-70 was fully awarded at 5.649% with a robust 3.6x bid-to-cover ratio, while the 10-year FXTN 10-73 cleared at 5.894% with 4.4x coverage. In the third week, the 7-year FXTN 10-69 was awarded at 5.74% with demand reaching 3.5x, while the 20-year FXTN 20-27 was fully awarded at 6.424% with a 2.5x bid-to-cover ratio. In other developments, the BTr reported that the national government's outstanding debt reached Php17.56 trillion as of the end of October 2025, an increase of Php106.78 billion. The rise was driven by net issuances of domestic and external liabilities, as well as valuation effects from the weaker peso against the US dollar. Domestic and external borrowings accounted for 68.6% and 31.4%, respectively, in line with the government's strategy to limit foreign currency risk.

Looking ahead, the BTr is set to conduct its final dual-tranche auction for the year in December, offering 3-year and 10-year bonds. The BSP and the Fed will also hold their final policy meetings of the year, while details of the 2026 borrowing program are expected by mid-month. Against this backdrop, the Fund remains selective in bond acquisitions, seeking to enhance portfolio yield while carefully managing duration risk.

## INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
