INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Money Market Fund intends to achieve a high level of liquidity and better earnings potential than those offered by regular savings and short-term time deposit accounts by investing in a diversified portfolio of marketable fixed income securities comprised of deposits, tradable money market instruments, government securities and corporate bonds and notes with a weighted average portfolio modified duration of not more than one (1) year. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM Index).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Money Market Fund is suitable only for investors who:

- have a moderate risk appetite;
- are willing to assume a certain level of risk in consideration for higher returns; and
- have an investment horizon of at least one (1) year.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The BPHILMM Index is a systematically designed, rules-based, market value-weighted index that measures the performance of short-term, fixed-rate and zero-coupon local currency securities that are publicly issued by the Philippines. It includes liquid money market instruments such as treasury bills with maturities of less than 1 year and minimum par amounts of Php3.0Bn. The Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, peso-denominated marketable fixed income securities with a duration of not more than 1 year, which are among the allowable investments of the Fund.

²Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

³Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

⁴Information Ratio measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

OUTLOOK AND STRATEGY

In January, the peso yield curve bull-steepened as weak gross domestic product (GDP) growth supported expectations of further monetary easing. Yields on average fell by 10 basis points (bps), with the short-end outperforming the rest of the curve. Rates for 1 year and below fell by 17 bps with the 1-year rate falling by 20 bps to 4.8412%. The belly declined by 14 bps, with the 2-year rate fetching 5.1883%, down 18 bps, while the long-end was up 4bps driven by ultra long tenors, as the 10-year rate fell 9 bps to 5.9868%. Trading volume for the month in increased by 54% to Php1.672 trillion, with RTBs accounting for majority or 43% of volume, followed by FXTNs at 30%.

Economic data last month continued to support the case for further monetary easing. GDP rose 3.0% in 4Q, bringing full-year 2025 growth to 4.4%, reflecting soft domestic demand, weaker investment activity, and construction delays linked to governance issues. Consumption and capital formation also moderated, though analysts expect growth to improve as reforms and project execution stabilize. Overseas remittances as of November softened month-on-month as holiday and typhoon-related transfers were front-loaded. Still, inflows reached USD2.91B, up 3.6% year-on-year, keeping remittances a steady FX anchor and lifting year-to-date cash remittances to USD32.11B. Meanwhile, inflation edged up to 1.8% in December, driven by food supply disruptions and holiday demand, partly offset by slower declines in rice prices. Inflation is expected to remain manageable despite slight base-effect pressure in 2026. Lastly, unemployment rose to 4.4% in November following typhoon damage, though holiday-season hiring should provide a temporary lift, with continued labor-market resilience anticipated into 2026.

In the primary market, the Bureau of the Treasury (BTr) raised Php176.6 billion in bonds and Php147.6 billion in bills in its weekly auctions. The auctions continued to be well-received by the market with bid-to-cover ratios averaging 3.41x for the bills and 2.38x for the bonds despite rates for the bond auctions averaging an uptick of 10 bps versus previous auctions. Looking ahead, the market will take its cue from key macroeconomic data heading into the BSP rate-setting meeting in February where a cut is widely expected. With this, the Fund continues to invest in a combination of time deposits, government securities and corporate bonds to optimize returns while managing liquidity.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- b) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds, notes and preferred shares which are classified as debt securities under appropriate accounting standards;
- c) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks or their Philippine branches or any financial institution in any foreign country;
- d) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- e) Such other tradable investment outlets/categories as the BSP may allow.
