INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Money Market Fund intends to achieve a high level of liquidity and better earnings potential than those offered by regular savings and short-term time deposit accounts by investing in a diversified portfolio of marketable fixed income securities comprised of deposits, tradable money market instruments, government securities and corporate bonds and notes with a weighted average portfolio modified duration of not more than one (1) year. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM Index).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Money Market Fund is suitable only for investors who:

- have a moderate risk appetite;
- are willing to assume a certain level of risk in consideration for higher returns; and
- have an investment horizon of at least one (1) year.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The BPHILMM Index is a systematically designed, rules-based, market value-weighted index that measures the performance of short-term, fixed-rate and zero-coupon local currency securities that are publicly issued by the Philippines. It includes liquid money market instruments such as treasury bills with maturities of less than 1 year and minimum par amounts of Php3.0Bn. The Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, peso-denominated marketable fixed income securities with a duration of not more than 1 year, which are among the allowable investments of the Fund.

OUTLOOK AND STRATEGY

In May, the peso yield curve bear steepened as markets stayed defensive amid uncertainty over U.S. trade and fiscal policy, despite expectations of a Philippine central bank rate cut as early as June. Yields rose by 2 basis points (bps) on average, with the long-end underperforming the rest of the yield curve. Long-end rates rose by 16 bps on average, while the short-end and belly fell by 4 bps and 2 bps respectively. Meanwhile, trading volume for May increased by 19.2% to Php1.302 trillion versus previous month, led by FXTNs which increased by 75% to Php644.846 billion, comprising 50% of total volume for the month.

Headline inflation fell further to 1.4% in April, the lowest growth in more than five years, driven by lower food and transport costs. Meanwhile, core inflation remained steady at 2.2%. As for the broad economy, Q1 2025 GDP grew by 5.4%, slightly below the 5.7% market forecast, but showed resilience amid global headwinds from US tariffs. Demand-side growth was driven by robust household consumption and increased government expenditures. On the supply side, the services sector emerged as the top performer, expanding by 6.3%. Conversely, the unemployment rate increased to 3.9% in March, pushing the Q1 2025 average up to 4%, with most of the job losses occurring in the agriculture sector and public sector. Meanwhile, growth in cash remittances slowed to 2.6% year-on-year in March, the weakest pace in nine months.

In the primary market, the Bureau of the Treasury raised Php129.758 billion from bond auctions of tenors of 3, 5, 7, 10, 15, and 20 years, and Php103.6 billion from bill auctions. Investor demand remained robust, as shown by average bid-to-cover ratios of 3.23 times for bonds and 3.02 times for bills. Bill yields declined by an average of 6 basis points compared to the previous month's auction results. In the coming month, markets will be on watch for key macroeconomic data including inflation, auction results, and the Bangko Sentral ng Pilipinas' Monetary Board meeting where a 25-bp policy rate cut is widely expected. With this, the Fund continues to maintain a strategic allocation across BSP bills, government securities, time deposits and corporate bonds to balance liquidity and returns.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- b) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds, notes and preferred shares which are classified as debt securities under appropriate accounting standards;
- c) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks or their Philippine branches or any financial institution in any foreign country;
- d) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- e) Such other tradable investment outlets/categories as the BSP may allow.
