INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Money Market Fund intends to achieve a high level of liquidity and better earnings potential than those offered by regular savings and short-term time deposit accounts by investing in a diversified portfolio of marketable fixed income securities comprised of deposits, tradable money market instruments, government securities and corporate bonds and notes with a weighted average portfolio modified duration of not more than one (1) year. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM Index).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Money Market Fund is suitable only for investors who:

- have a moderate risk appetite;
- are willing to assume a certain level of risk in consideration for higher returns; and
- have an investment horizon of at least one (1) year.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk**. This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

The BPHILMM Index is a systematically designed, rules-based, market value-weighted index that measures the performance of short-term, fixed-rate and zero-coupon local currency securities that are publicly issued by the Philippines. It includes liquid money market instruments such as treasury bills with maturities of less than 1 year and minimum par amounts of Php3.0Bn. The Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, peso-denominated marketable fixed income securities with a duration of not more than 1 year, which are among the allowable investments of the Fund.

OUTLOOK AND STRATEGY

In September, the peso yield curve bear-flattened as elevated oil prices, a weaker peso, rising global yields, and expectations of further monetary tightening weighed on sentiment. On average, yields increased 32 basis points (bps) month-on-month, with the short end and belly underperforming. The 1-, 3-, and 6-month yields rose by 29 bps, 37 bps, and 31 bps to 5.18%, 5.47%, and 5.80%, respectively, while the 1-year yield climbed 39 bps to 6.09%. In the belly, the 2-year yield increased 40 bps to 6.73% and the 5-year yield rose 34 bps to 7.41%. The 10-year yield moved 36 bps higher to 7.62%, while the 20- to 25-year tenors increased by around 17 bps. Trading volume fell 37% to Php613.8 billion. FXTNs accounted for 48% of activity, followed by Treasury bills at 37% and RTBs at 13%.

Domestic conditions remained marked by persistent inflation risks and weaker growth momentum. The BSP lowered its 2026 inflation forecast to 6.1% from 6.4%, but raised its projections for 2027 and 2028 to 5.4% and 3.3%, respectively, citing El Nino and higher wage assumptions. Growth expectations were also revised lower, with S&P Global cutting its 2026 GDP forecast to 2.9% from 4.1% and the ADB lowering its estimate to 3.3% from 3.8%, reflecting subdued consumption and a gradual recovery in investment. Meanwhile, cash remittances reached USD3.24 billion in July, up 1.9% year-on-year, while the August budget deficit nearly doubled to Php161.3 billion. Business confidence improved to -10.9 in August from -20.3 in July, although renewed oil and peso pressures kept the outlook for inflation and monetary policy cautious.

In the primary market, the Bureau of the Treasury (BTr) continued to offer Treasury bills and bonds across the curve, including 35-, 63-, 91-, 182-, and 364-day bills and 4- to 10-year bonds. Demand for bills remained supportive but varied by tenor. Bond demand was more selective as investors required higher yields amid global rate and oil-price pressures. Toward month-end, the BTr also announced a new 2.5-year retail Treasury bond with an indicative rate of 6.875%-7.125%. Looking ahead, markets will focus on inflation, BSP policy guidance, oil prices, peso movements, and domestic supply. The Fund will maintain its diversified fixed-income exposures to preserve liquidity while seeking to optimize returns.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

a) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);

b) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds, notes and preferred shares which are classified as debt securities under appropriate accounting standards;

c) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks or their Philippine branches or any financial institution in any foreign country;

d) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and

e) Such other tradable investment outlets/categories as the BSP may allow.
