¹As a percentage of average daily NAV for the month valued at Php1,064.03 million.

INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Philippine Equity Index Tracker Fund intends to achieve capital appreciation by investing in a diversified portfolio of equities representative of the Philippine Stock Exchange Index (PSEi) composition and its corresponding weights. The Fund aims to mirror the returns of its benchmark, which is the Philippine Stock Exchange PSEi Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee’s principal office.

The Chinabank Philippine Equity Index Tracker Fund is suitable only for investors who:

- have an aggressive risk appetite;
- are willing to accept higher risks involving volatility of returns and possible erosion of principal in return for capital appreciation and potentially better long-term results; and
- have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower’s failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.
- **Index Tracking Risk.** This is the possibility that an investor will not be able to achieve a return that mirrors the index due to operational and fund management expenses.

The Trustee only transacts with reputable counterparties and invests in equities issued by prime companies which have undergone a rigorous accreditation and evaluation process. Internal and regulatory exposure limits are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. Furthermore, the Fund undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

- THE UITF IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED NOR GOVERNED BY THE PDIC.
- THE UITF IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUST ENTITY OR ITS AFFILIATES OR SUBSIDIARIES.
- DUE TO THE NATURE OF THE INVESTMENTS OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED. HISTORICAL PERFORMANCE, WHEN PRESENTED, IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.
- ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.
- THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.
- THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF’S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.

^aNew Benchmark; ^bOld Benchmark

The Fund’s benchmark was amended from PSEi to PSEi TRI effective January 1, 2024 in compliance with BSP Circular No. 1178 (Guidelines on the Use of Benchmarks for Unit Investment Trust Funds) on the use of a total return benchmark that will more adequately represent the performance of the Fund.

The PSEi TRI tracks the performance and income from dividend payments of the PSEi constituents by reinvesting cash back to the index. The PSEi is a composite index that tracks the performance of the top 30 publicly listed companies in the Philippines based on market capitalization and is computed using a free-float, market capitalization-weighted methodology. It includes a diversified range of companies from various sectors of the economy including financials, property, industrials, services and holdings firms, among others. Additional information on PSEi TRI and/or its administrator is available on www.pse.com.ph/indices.

RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper, amounting to Php1.76 million, which were approved by the Board of Directors/Trust Investment Committee. Likewise, all related parties transactions are conducted on an arm’s length basis.

OUTLOOK AND STRATEGY

The Philippine Stock Exchange Index (PSEi) started the second half of the year on a positive note. Investors cheered as Philippine inflation data continued to soften. The print for June came in at 3.70%, an improvement compared to the prior month’s 3.90% reading and last year’s 5.40%. This further supports expectations that the Bangko Sentral ng Pilipinas (BSP) will begin

NAVPU OVER THE PAST 12 MONTHS

Highest	1.037614
Lowest	0.880836

STATISTICS

Weighted Average Duration	0.00
Volatility, Past 1 year ²	5.27%
Sharpe Ratio ³	-0.53
Information Ratio ⁴	-5.94
Tracking Error ⁵	0.66%

²Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

³Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund’s volatility.

⁴Information Ratio measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund’s volatility.

⁵Tracking Error measures how close the Fund’s performance is relative to its benchmark. It is computed as the standard deviation of the Fund’s return over the benchmark return. The lower the tracking error, the closer the Fund approximates its benchmark.

TOP TEN HOLDINGS (%)

SM	14.4%
ICT	10.0%
BPI	8.8%

SMPH	8.3%
ALI	5.7%
AC	5.0%
MBT	4.0%
TEL	3.3%
JFC	3.1%

reducing policy rates as soon as August of this year. Similarly, US inflation cooled for the third straight month in June, while the unemployment rate ticked up. With the US Federal Reserve (Fed) acknowledging the progress made on the fight against inflation while at the same time being wary of softening labor market, market participants are increasingly betting for rate cuts to commence soon. The futures market is pricing in with near 100% probability a 25bps cut in September, followed by another 25bps in December.

For the month of July, the index gained +207.18pts or +3.23% to close at the 6619.09 level. This as foreign funds were seen as net buyers in 16 out of 21 trading days, accumulating a total position worth Php3.71Bn. Except for Mining and Oil (-1.88%), all sectors closed in the green with Holding Firms (+4.04%), Financials (+3.41%), Industrials (+3.15%), Property (+2.26%), and Services (+1.05%) pulling the market higher. Notably, the property sector was initially on pace to outperform during the month. However, sentiment soured as during Pres. Marcos' third state of the nation address, he announced the total ban on POGOs effective immediately. In terms of individual stock performance, ACEN (+10.96%), SM (+9.33%), CNPF (+8.87%), PGOLD (+8.68%), and URC (+7.01%) led the index gainers. On the other hand, BLOOM (-13.04%), NIKL (-9.70%), AEV (-8.63%), GTCAP (-4.84%), and MONDE (-2.45%) rounded the list of top index decliners. Index breadth was positive, 21-9. On the earnings front, 8 out of the 30 PSEi members have already reported their Q2 and H1 2024 results. By our count, 3 names were ahead (BPI, MER, SCC), 3 were in-line (BDO, MBT, AEV), and 2 were behind (URC, WLCON) compared to consensus expectations.

Looking at the overall market activity, the average daily traded value ex bloc trades for the month was registered at Php4.45Bn. This was lower compared to the first half average of Php5.021Bn. We may see more of the same low activity in the following month as seasonality is not in favor of risk assets historically during this time of the year. From available Bloomberg data, the month of August brought subdued returns 70% of the time in the local setting. While challenging in the near term, bouts of market weakness can be viewed as opportunities to add on positions. Presently, valuations using 2024 consensus earning sees the PSEi trading at 11.36x P/E. This is equivalent to an earnings yield of 8.80%, offering a 263bps spread compared to the 6.17% yield of the 10Y government security. The anticipated rate cutting cycle, if it materializes, may result to P/E multiple expansion. This then can finally improve PSEi's YTD performance, which currently stands at just +2.62%.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Equities listed in the PSE;
- b) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks or their Philippine branches or any financial institution in any foreign country; and
- c) Such other tradable investment outlets/categories as the BSP may allow.
