<sup>1</sup>As a percentage of average daily NAV for the month valued at Php7,270.34 Million.

### INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Short-Term Fund intends to achieve a high level of liquidity and better earnings potential than those offered by money market placements, regular savings deposit and short-term time deposit accounts by investing in a diversified portfolio of marketable financial instruments including deposits issued by financial institutions, money market instruments, government securities, BSP securities, corporate bonds/notes with a weighted average portfolio modified duration of not more than one (1) year, and preferred shares classified as debt securities. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM Index).

### CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Short-Term Fund is suitable only for investors who:

- have a moderate risk appetite;
- are willing to assume a certain level of risk in consideration for higher returns; and
- have an investment horizon of at least one (1) year.

### KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

**-THE UITF IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUST ENTITY OR ITS AFFILIATES OR SUBSIDIARIES.**  
**-DUE TO THE NATURE OF THE INVESTMENTS OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED. HISTORICAL PERFORMANCE, WHEN PRESENTED, IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.**  
**-ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.**  
**-THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**  
**-THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF'S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.**

The BPHILMM Index is a systematically designed, rules-based, market value-weighted index that measures the performance of short-term, fixed-rate and zero-coupon local currency securities that are publicly issued by the Philippines. It includes liquid money market instruments such as treasury bills with maturities of less than 1 year and minimum par amounts of Php3.0Bn. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, peso-denominated marketable fixed income securities with a duration of not more than 1 year, which are among the allowable investments of the Fund.

### OTHER DISCLOSURES

#### RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper, amounting to Php155.80 million which were approved by the Board of Directors/Trust Investment Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

#### OUTLOOK AND STRATEGY

In February, the peso yield curve bull-steepened as the Bangko Sentral ng Pilipinas (BSP) continued its monetary easing cycle amid soft inflation and weakening economic data. Yields declined across most tenors, led by the short and belly segments. On average, yields fell by around 9 (basis points) bps month-on-month, with the front-end outperforming. Rates for one year and below declined by an average of 25 bps, with the 1-year yield falling 22 bps to 4.6208%. The belly also moved lower, as the 2-year rate eased 4 bps to 5.1526%, while medium tenors declined by 8 bps. At the long end, performance was mixed, as ultra-long tenors edged higher by 2 bps, while the 10-year yield declined 6 bps to 5.9238%. Trading volume fell 12% to Php1.467 trillion, reflecting softer activity following January's surge. FXTNs accounted for the largest share at 39%, followed by RTBs at 37%, while Treasury bills comprised 14% of total volume.

Macroeconomic developments during the month reinforced expectations of continued monetary easing. Domestic demand indicators softened, with bank lending growth slowing to 9.2% in December, the weakest pace in nearly two years, amid subdued investment activity and delays in public infrastructure spending. The BSP cut its policy rate by 25 bps to 4.25%, citing manageable inflation

<sup>2</sup>Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

<sup>3</sup>Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

<sup>4</sup>Information Ratio measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

and growing concerns over slowing growth, anchoring short-term rates amid ample system liquidity. While headline inflation rose to 2.0% in January and core inflation firmed, price pressures remained within target and were viewed as largely supply-driven, limiting upside risks to medium-term yields. External inflows remained supportive, as cash remittances grew 4.2% year-on-year to a record USD35.6 billion in 2025, providing a stable FX buffer.

In the primary market, BTr auctions remained well-received, with bid-to-cover ratios averaging 3.8x for bills and 2.6x for bonds, allowing most auctions to clear at stable to lower yields, particularly at the short end. The BTr also successfully raised Php297.9 billion from its issuance of a new 10-year benchmark bond, FXTN 10-64, priced at a 5.925% coupon. Looking ahead, markets will continue to take cues from upcoming inflation and macroeconomic data. In this environment, the Fund maintains a diversified allocation across time deposits, government securities, and corporate bonds to optimize returns while managing liquidity.

#### INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
