Philippine Depository & Trust Corp.

<sup>1</sup>As a percentage of average daily NAV for the month valued at Php6,231.19 Million.

### INVESTMENT OBJECTIVE AND STRATEGY

The Chinabank Short-Term Fund intends to achieve a high level of liquidity and better earnings potential than those offered by money market placements, regular savings deposit and short-term time deposit accounts by investing in a diversified portfolio of marketable financial instruments including deposits issued by financial institutions, money market instruments, government securities, BSP securities, corporate bonds/notes with a weighted average portfolio modified duration of not more than one (1) year, and preferred shares classified as debt securities. The Fund aims to outperform its benchmark which is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM Index).

### CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Before deciding to invest, clients are advised to read the Declaration of Trust, a copy of which is available at the Trustee's principal office.

The Chinabank Short-Term Fund is suitable only for investors who:

- have a moderate risk appetite;
- are willing to assume a certain level of risk in consideration for higher returns; and
- have an investment horizon of at least one (1) year.

### KEY RISKS AND RISK MANAGEMENT

The client should not invest in this Fund if the client does not understand or is not comfortable with the accompanying risks.

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in the market price of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Credit/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans or other forms of security which the borrower issued. It also includes risk on a counterparty (a party the Trustee trades with) defaulting on a contract to deliver its obligation either in cash or securities.
- **Reinvestment Risk.** This is the possibility for an investor to have lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Trustee only transacts with reputable counterparties and invests in debt securities issued by prime corporate borrowers which have undergone a rigorous accreditation and evaluation process. Regulatory exposure limits as well as the Fund's average duration are monitored regularly to ensure that exposures are managed. The Fund also employs risk management measures to monitor significant declines in the Fund's NAVPu and alert the Trustee to review current strategies and take corrective action as necessary. The Fund also undergoes an annual review to ensure that it is equipped to fund any redemption requirement in a timely manner and at a reasonable cost during times of financial stress.

**-THE UITF IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUST ENTITY OR ITS AFFILIATES OR SUBSIDIARIES.**  
**-DUE TO THE NATURE OF THE INVESTMENTS OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED. HISTORICAL PERFORMANCE, WHEN PRESENTED, IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.**  
**-ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.**  
**-THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**  
**-THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF'S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.**

The BPHILMM Index is a systematically designed, rules-based, market value-weighted index that measures the performance of short-term, fixed-rate and zero-coupon local currency securities that are publicly issued by the Philippines. It includes liquid money market instruments such as treasury bills with maturities of less than 1 year and minimum par amounts of Php3.0Bn. This Index is adjusted for tax by the Trustee, but does not reflect deductions for fees and expenses. Additional information on the benchmark and/or its administrator can be found on Bloomberg, and be made available to investors upon request.

The benchmark provides a reference for evaluating the performance of highly liquid, peso-denominated marketable fixed income securities with a duration of not more than 1 year, which are among the allowable investments of the Fund.

### OTHER DISCLOSURES

#### RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper, amounting to Php2.57 million which were approved by the Board of Directors/Trust Investment Committee. Likewise, all related parties transactions are conducted on an arm's length basis.

#### OUTLOOK AND STRATEGY

In March, the peso yield curve bear-steepened amid heightened inflation risks and weaker growth expectations stemming from the US-Iran conflict. Yields increased across all tenors, led by the belly of the curve. On average, yields climbed by about 78 basis points (bps) month-on-month. The 5-year yield rose by 115 bps to 6.71%, while the 2-year rose 88 bps to 6.03%. Medium tenors increased by roughly 104 bps, while short-dated yields rose by an average of 55 bps, with the 1-year rate reaching 5.17%. At the long end, the 10-year rate increased by 101 bps to 6.93%, while ultra-long tenors rose by around 48 bps. Trading activity lightened, with volume declining 19% month-on-month to Php1.19 trillion. FXTNs accounted for 38% of total volume, followed by RTBs at 36% and Treasury bills at 18%.

Market sentiment shifted amid ongoing Middle East tensions. The Bangko Sentral ng Pilipinas (BSP) revised its headline inflation forecast to 3.1-3.9% from 2.4%, driven by higher fuel, electricity, and rice prices, as well as peso depreciation, with the currency hitting a

<sup>2</sup>Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. This is computed by getting the standard deviation of the yearly returns for the past 12 mos.

<sup>3</sup>Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better. This is computed by dividing the excess return of the fund against the risk-free rate over the fund's volatility.

<sup>4</sup>Information Ratio measures the reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk. This is computed by dividing the excess return of the fund against the benchmark over the fund's volatility.

record low near Php60.7/USD. While inflation remained within target, the BSP raised its 2026 forecast to 5.1% and kept the policy rate unchanged at 4.25% in their Monetary Board meeting, citing supply-driven pressures and subdued growth. GDP growth slowed to 3.0% in 4Q25, bringing full-year 2025 growth to 4.4%, mainly due to weak investments. Meanwhile, liquidity conditions remained supportive, with bank lending and money supply growth improving.

In the primary market, Bureau of the Treasury (BTr) auctions remained generally well-received as bid-to-cover ratios (B2C) around 2x for bills and 1.5x for bonds. However, investors were selective as auctions of 5-, 7-, 10-, and 25-year bonds were mostly partially awarded, while the 3-year offering late in the month was rejected as the BTr capped rates. Overall, the BTr raised approximately Php142.4 billion, comprising Php87.1 billion from bills and Php55.2 billion from bonds. Looking ahead, market direction will remain sensitive to geopolitical developments. The Fund maintains a diversified allocation across deposits and fixed-income assets to manage risk while optimizing returns.

#### INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may be invested or reinvested in the following:

- a) Securities issued by or guaranteed by the Philippine government or the Bangko Sentral ng Pilipinas (BSP);
- b) Tradable fixed income securities issued by private and public corporations which are listed and traded in an organized exchange/market such as bonds, notes and preferred shares which are classified as debt securities under appropriate accounting standards;
- c) Deposits and tradable money market instruments issued by local banks, including those of the Trustee's own bank, and foreign banks or their Philippine branches or any financial institution in any foreign country;
- d) Financial derivatives instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund, provided that these are accounted for in accordance with existing BSP hedging guidelines as well as the Trustee's risk management and hedging policies duly approved by the Trust Investment Committee and disclosed to participants; and
- e) Such other tradable investment outlets/categories as the BSP may allow.
